

Data Retrieval

- Things we “don’t have” or don’t work well
 - Better layout/display
 - Speed?
 - Repeated hits? Instant
 - Multiple entry datasets
 - Grouping entries? Instant
 - ID search? Instant
- Things we have, but people doesn’t find or use
 - Expanded results (available in instant search -> multiple search engines) 3
 - Advanced search
 - CS search
 - Annotations?
 - Download DB / Synchronize?
 - Name searches (Instant search does it well)
 - Download single entry (“not obvious”)
- Not applicable?
 - Structural data (link to PDB)
 - Readability? / NMR-STAR complexity

Visualization

- Mostly DEVis problems
 - Does not work / difficult to run
 - Java updates needed
- Other visualizations
 - Reversed axis
 - Low resolution?
 - Slow and cumbersome
 - Printing

Tools

- CS Rosetta
 - RDC option (available but not found)
- API
 - Not really used (yet)

Website

- Problems / complaints
 - Navigation
 - Easy search (see data retrieval)
 - Dated
 - Need to be simpler and cleaner
 - Layout / Interface
- Deposition
 - Starch problems
 - File conversion (macros)
 - Pre-validation
- FTP server
 - Needs better documentation on existing files
 - Easier bulk download / subsets
- NMR-STAR
 - Better documentation
- BMRB data access is missed in home page

Most comments

- Search problems
 - Search results (not relevant, only IDs)
 - Single entry
- Data download
 - Single entry
 - Bulk and subsetting
- Navigation / Layout
- DEVis
- Better format converters
- Better documentation
